

The bath and toilet

How to take a bath

It is important to take care when taking a bath in another person's house or in a public bathhouse.

Before getting into the bathtub, wash your body using soap and rinse by pouring hot water over yourself (in the event there is no shower). Use soap to wash yourself outside of the tub. Do not wash your body in the bathtub. The hot water in the tub is not changed for each person, so do not take out the plug and drain the water.

Toilet (The disposal of human waste)

In urban areas most toilets are flush toilets. However, in some districts where there are no flush toilets, a human waste collection service is provided. In Nishinomiya City, any waste is collected by contracted companies.
